Netty 5 user guide | ifeve.com

ifeve.com/netty5-user-guide [Translate this page](#)

Netty is a high-performance event-driven network application framework for asynchronous communication. It is designed to be used as a building block for network applications. Netty is based on the NIO (Non-blocking I/O) API and provides a simple and easy-to-use API for writing network applications. Netty is highly scalable and can handle a large number of concurrent connections. Netty is also highly flexible and can be used to implement a wide range of network protocols.
