Search based on what phase it is in. All the red ones will count up the cells found in each phase and the blue numbers to predict how many cells a dividing cell spends in each phase. You can find your information on a real cell cycle of 20 hours.

Copy this table onto a piece of paper. You can use this in the work you are doing, or at the end of the lab.

	Interphase	Prophase	Metaphase	Anaphase	Telophase	Total
number of cells	20	18	3	2	1	44
percent of cells	45%	41%	7%	5%	2%	100%
Time in hours on the slide	13.44	6.72	3.12	1.44	0.72	-
