Sound Waves - Media College

www.mediacollege.com/audio/01/sound-waves.html

Sound waves exist as variations of pressure in a medium such as air. They are created by the vibration of an object, which causes the air surrounding it to vibrate.

Sound - Wikipedia

https://en.wikipedia.org/wiki/Sound_waves

In physics, **sound** is a vibration that propagates as a typically audible mechanical wave of pressure and displacement, through a transmission medium such as air or water.
